Student Wellness and Success Funds and Disadvantaged Pupil Impact Aid

Triway Local Schools took a multi-tiered approach to student well-being by leveraging Student Wellness and Success Funds and Disadvantaged Pupil Impact Aid. The concept of enhancing student wellness and success within our schools is crucial as those factors directly impact academic performance, emotional resilience, and overall development. A focus on wellness creates a supportive environment that nurtures physical health, mental well-being, and social skills, enabling students to thrive both academically and personally. Promoting wellness through programs, counseling, and healthy practices helps students manage stress, build positive relationships, and develop lifelong habits. Ultimately, prioritizing student wellness lays the foundation for a healthier, more productive future generation.

The Ohio Department of Education and Workforce (ODEW) provides school districts and schools with Student Wellness and Success Funds and Disadvantaged Pupil Impact Aid to implement initiatives that support wraparound services for students. Triway Local School District partnered with Akron Children's Hospital to bring additional medical and mental health resources to students. OHuddle, a 1:1 mentorship program, provided personalized support to students. Our partnership with the Wayne County Sheriff's Department to provide a School Resource Officer for the district allows us to increase safety initiatives within our schools. Our expansion of counseling and social worker support ensured students had access to emotional and social-learning resources. These initiatives aimed to address a range of student needs, both preventative and responsive.

The document below shows quantitative and qualitative data regarding our OHuddle mentorship program.
